6	optixRPM TM	E	EP	P	PC	C	7	optixFIGRANGE TM
			1 2 5 6	3		7		82-74

1. OptixPLOT Header

Identifies details of Selected Race

2. PlotFit

Indicates confidence of OptixPLOT's assessment of this race by measuring how closely the entire race lines up along the white flow-band (a diagonal line running from upper-left to lower-right) of each OptixPLOT

-  Excellent
-  Good
-  Average
-  Below Average

3. Pace Contention

Assesses the potential early pace contention of the race

-  High Contention
-  Average Contention
-  Soft Contention

4. Speed Rate

Assesses the potential early speed rate of the race

- 0-24 slow speed
- 25-50 average speed
- 50+ very fast speed

5. OptixGRID

Switch to OptixGRID screen for in-depth detail about the past performances of all horses in this race

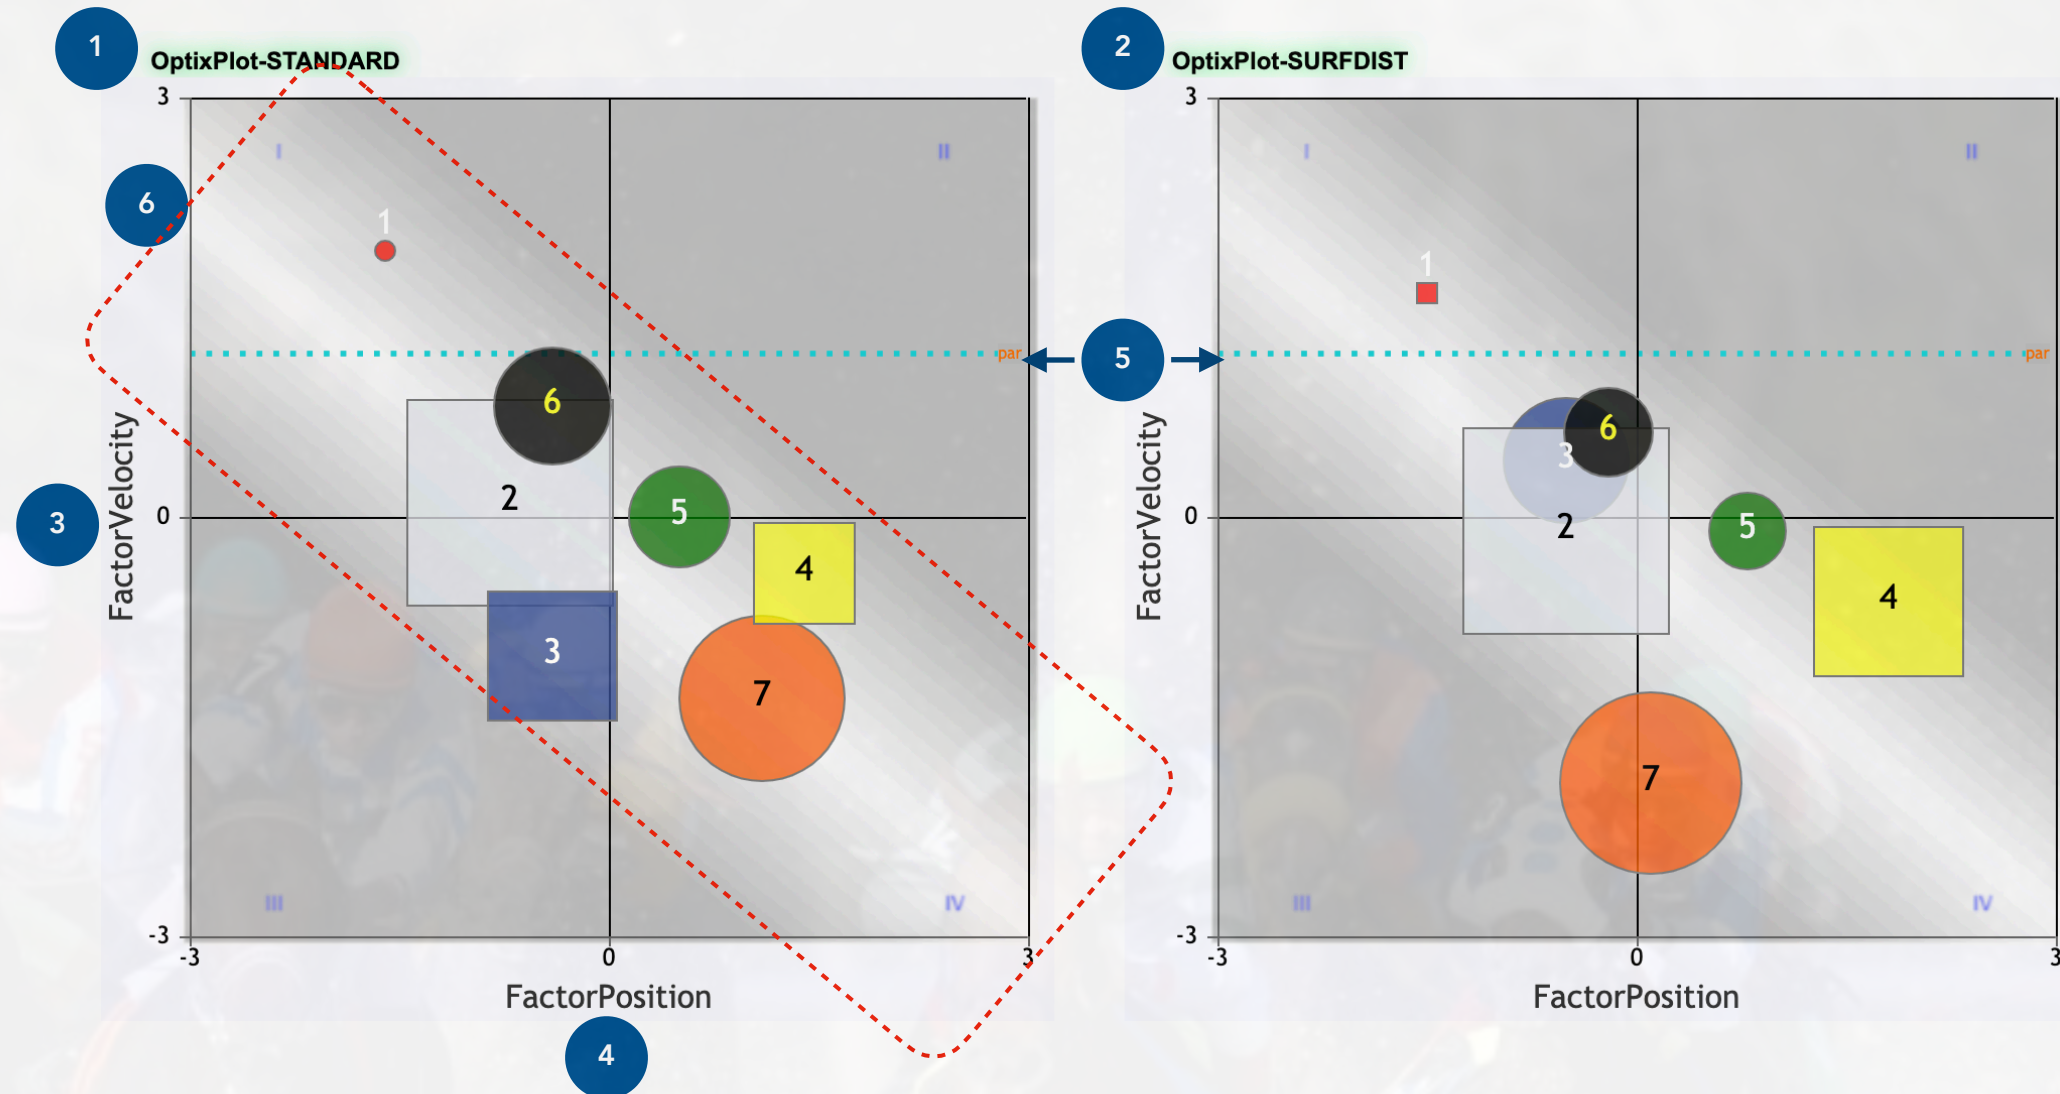

6. optixRPM

Runstyle Plot Match: Strength of match between Horse's Run Style & OptixPLOT position **Good** **Average** **Poor**

7. optixFIGRANGETM

Projected Optix Speed Figure needed for this race

OPTIXPLOT

1. OptixPLOT-STANDARD

Represents the pace-dynamics of the race using each runner's most recent races, regardless of surface or distance.

2. OptixPLOT-SURFDIST

Represents the pace-dynamics of the race using each runner's most recent races only on the given surface and distance.

3. X-axis Factor Velocity

Represents the "Early Pace Position," or where the horse should be at the first call. (The farther to the left, the closer to the lead.)

4. Y-axis Factor Position

Represents the Early Pace Velocity - how fast a horse runs from the 1st point of call to the 2nd (Higher=faster to the 2nd point of call.)

5. Par Line

The point on the Y-axis where a mythical horse with an average velocity time would fall if running with the class of horses in this race.

6. Flow Band

Viewing the field on the plot along the diagonal white flow-band gives you a pretty accurate picture of where a horse will be positioned before turning for home.

OPTIXPLOT VBAR

The **Optix VBar** (located to the right of the OptixPLOT header) is a graph that uses handicapping metrics to compare all of the horses in the race. There are 8 Categories to choose from and each are comprised of individualized metrics for comparison. All of the statistical categories for each horse represented on the graph are in relation to the other horses in this field.

1. VBar Category Option Choose from 8 Categories in the drop down menu. Speedfigs is the default category and will always display first. A checkmark will appear next to the category displayed.

2. Show/Hide Buttons

- s Show All** All category metrics are displayed on the bar graph.
- h Hide All** All category metrics are removed from the bar graph.

3. Average Line

Above line/Positive # - Best plot match
Slightly Above/Below Line - OK/neutral match
Below line/Negative # - Worst Plot match

4. VBar Metrics Each category's specific metrics are identified below the bar graph and color coded to correspond to the bars on the graph. Graph bars are displayed in the same order as the metrics below with each line reading from left to right. You can choose to view all, some or even just one of these metrics at the same time. Hovering over bars or metric text will give alternative displays. Clicking on metric text will make that metric appear/disappear. See the OptixPLOT User Guide for detailed metric explanation and viewing options.

OPTIXPLOT PAST 3 RUNLINES

This chart displays to the right of the OptixPlot. It shows Post #, Horse Name, Jockey & Trainer as well as important key details of the horse's previous 3 races.

OPTIXPLOT RESULTS

1. OptixPLOT Results Color Coding

3 colors are used to identify the horses that finish "In the Money"

- W** Win - 1st Place Runner
- P** Place - 2nd Place Runner
- S** Show - 3rd Place Runner

2. Order of Finish

Lists the order that horses crossed the Finish Line. Includes the OptixNOTES Grade and Final Odds. Located next to the OptixPLOT Header.

3. OptixRESULTGRAF™

Visual representation of how the race was won by charting all runners positions throughout the race. Located below the OptixPLOT and available after the completion of the race.

4. Index

Saddlecloth color, position # and name of each horse.

5. X-axis

Represents noted race segments - Start, 1st point of call, 2nd point of call, 3rd point of call, Finish.

6. Y-axis Factor Position

Represents the running order/position of the horses during noted race segments.

7. Display

Indicates which horses are displayed in the OptixRESULTGRAF. You can choose which runners to include by checking/un-checking the box next to the horse. Default includes all runners.
